6298.0.55.001 - Labour Force Survey Standard Errors, Data Cube, Jul 2008 (Reissue)

Previous ISSUE Released at 11:30 AM (CANBERRA TIME) 22/08/2008 Reissue

Summary

About this Release

This spreadsheet allows the calculation of standard errors for estimates from the monthly Labour Force Survey (LFS). Modifications contained in the July 2008 release of this product accommodate a reduction in the size of the LFS sample which takes effect from the July 2008 survey (statistics released in August 2008).

This re-issue corrects an error in the "Level or Rate" model. The correction increases the standard errors of level or rate estimates generated for Australia for the months of November 2007 to June 2008.

The paper Labour Force Survey Standard Errors, 2005 (cat. no. 6298.0) provides useful information on how to use this spreadsheet. This paper will be revised at a later date.
